D.I. Roof Seamers proudly introduces the "Contractor Series" Roof Seamer.

Corinth, MS, February 22, 2010 — D.I. Roof Seamers proudly introduces the "Contractor Series" Roof Seamer. Available for delivery after May 3, 2010, this machine is designed to reduce capital investment for any contractor or builder who owns their own portable roll former.

This Roof Seamer has been designed to help contractors and builders who own their own portable roll former. With competitive prices, these machines are equipped to provide a builder with the ability to own their own Roof Seamer without a large capital investment. Created to work with the most common standing seam panel profiles, this machine can be ordered with two sets of optional tooling. Architectural style roof panels with a 1 1/2" or 2" seam height and either a 1/2" or 3/4" unseamed female leg width can be formed into a 90° or 180° seamed profile.

Purchase prices for the "Contractor Series" Roof Seamers are as follows:

2-Station Single Direction 90° Roof Seamer	\$2,499.99
3-Station Bi-Directional 90° Roof Seamer	\$2,999.99
4-Station Single Direction 180° Roof Seamer	\$3,199.99

The machine is self propelled with hands free operation. Built with a durable 9 amp/115 volt/60 cycle electric motor, it is equipped with a quick-disconnect plug for added safety and an optional onboard hour meter to keep track of usage and maintenance. Recommended for use with 24 gauge panels only. The machine is exceptionally lightweight and fast and comes with a thirty day manufacturer's warranty. Extended warranties are available for purchase. All roof seamers come with user-friendly owner's manuals in both English and Spanish for bilingual installation crews.

The "Contractor Series" Roof Seamer may be ordered immediately, but will not be released for delivery until Monday, May 3, 2010.

Developmental Industries, Inc. was found in 1989 by two brothers, Terry and Ted Rider. The Rider's quickly saw a need for the development of a machine to help contractors and builders install standing seam metal roof safer and more efficiently. With the development of the first Roof Seamer, the company grew to a full 60,000 sq. ft. CNC machining facility. Located in Northeastern Mississippi, Developmental Industries, Inc. is now the largest CNC facility in the region and is committed to sustaining America jobs and doing their part to rebuild the economy. All machines, hand tools and other products offered by Developmental Industries, Inc. are manufactured and assembled in our facility. D.I. Roof Seamers, the division of Developmental Industries, Inc. that handles all Roof Seamer products and services, is proud to offer many Roof Seamer rental and purchase options along with a full line of hand crimpers, hand tools, roof removal tools and other accessories. More information can be found by visiting www.diroofseamers.com.
