

### **FOR IMMEDIATE RELEASE:**

Corinth, MS – August 16, 2016 — D.I. Roof Seamers proudly announces the Rental Protection Plan to help provide customers with a worry-free rental experience.

During an equipment rental from D.I., a builder can rest assured knowing their liability is limited should accidental damage to the equipment occur. For a fee of USD \$20.00, this feature will be an optional purchase available on select rental equipment, including any electric roof seamer model, *D.I. Revolution™*, *D.I. Curver 1000™*, and *D.I. Cap Curver™*. The Rental Protection Plan will be available to purchase when a customer submits their rental form online. If purchased, a customer's liability, if damage occurs to the rental equipment, would be limited to 10% or USD \$500, whichever is less.

“Although the times that severe damage occurs is infrequent, when it does happen, the RPP is going to save the end user a lot of money and time.” stated Business Development Manager Bo Newman. “We always encourage safety to be used with our equipment, but sometimes accidents happen. This will give our customers some peace of mind.”

The Rental Protection Plan is available starting October 3, 2016 and is just the latest addition to D.I. Roof Seamers' large product and service offerings. You can find more information about the Rental Protection Plan online at [www.diroofseamers.com/rpp/rpp.html](http://www.diroofseamers.com/rpp/rpp.html)
